Albert Einstein

EINSTEIN

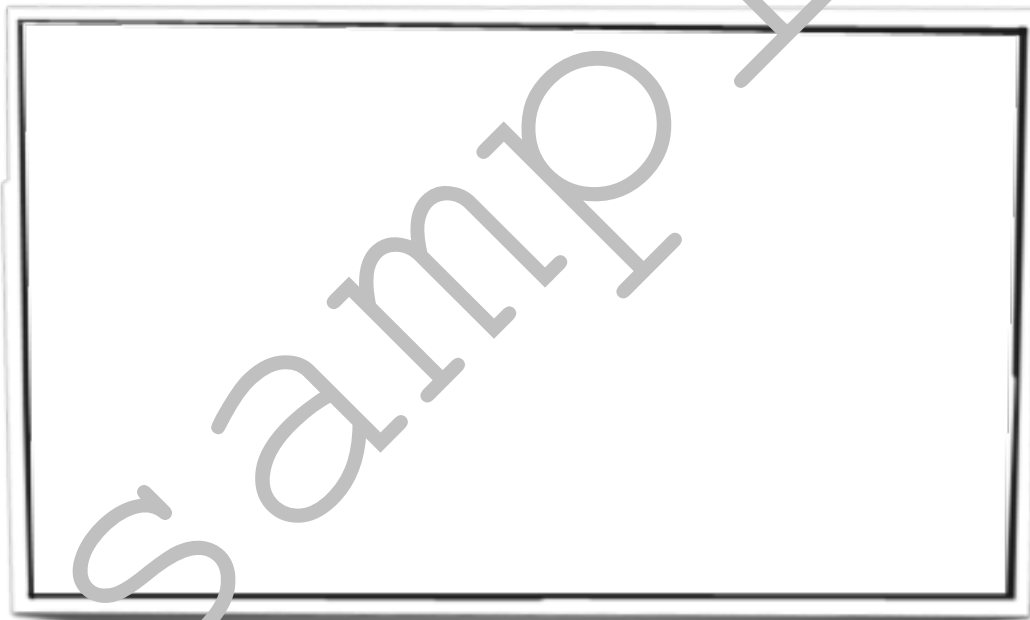

When Einstein was 5 years old, his father gave him a compass. Einstein didn't just play with the compass as most children would at that age. He asked endless questions about how and why the needle always pointed north.

When Einstein started school he not only had trouble with the other children but with the teachers, as well. Not only was he a slow learner but he was absent-minded. Einstein also had trouble paying attention in class.

Einstein hated school. He disliked the strict discipline and memorizing lessons. Einstein didn't want to memorize. He wanted to think about, examine, and question things.

Draw a picture of a compass in the box below. Write a definition on the lines for the word compass.

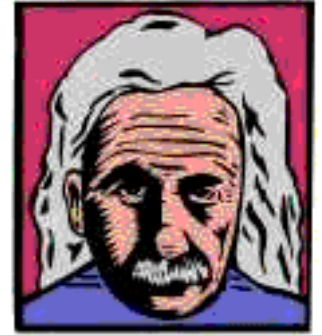

EINSTEIN

Einstein had no use for money. When he received the Noble prize, he gave his prize money to charity. It is said he once used a check for \$1,500 for a bookmark which he later lost.

Einstein moved to America in 1933. He liked it in America and decided to stay. In 1940, he became an American citizen.

The absent-minded, strange, slow learning child blossomed into a genius. This genius changed the ideas people had about the world and the universe forever.

FACTS

He was born in 1879.

He was the first to show that atoms really existed.

Einstein showed that light was both a particle and a wave.

He was given the Nobel Prize for Physics in 1921.

$E=mc^2$ is the special theory of relativity. E stands for energy, m stands for mass, and c stands for the speed of light.

Einstein was considered the most important scientist in the 1900's.

Einstein died in 1955.

EINSTEIN

CRISS CROSS

Can you fit these words into the criss cross?
Use a pencil so you can erase if you need to.

mass
light

theory
energy

speed
research

relativity
work
